## Definitions

### Dwelling

For census purposes, a dwelling is a structurally separate set of living quarters, with a private entrance either from outside or from a common hall or stairway inside the building. The various types of dwellings are:

**Single detached:** This type is commonly called a "single house". It contains only one dwelling unit which is completely separated on all sides from any other dwelling or structure.

**Single attached:** This category includes dwelling units separated by a common wall extending from ground to roof. Single attached dwellings in structures consisting of only two dwelling units are classified as **single attached (double)**. All other single attached dwellings whether in rows of three or more dwellings or simply a unit adjoining a store or other non-residential structure, are classified as **single attached (other)**.

**Apartments and flats:** These dwellings are also subdivided into two categories. **Apartment, flat (duplex)** refers to each dwelling in a structure originally designed, or structurally converted, to provide two dwelling units, one above the other and adjoining no other structure. **Apartment, flat (other)** includes all dwellings of the apartment, flat-type other than the duplex-type mentioned above.

**Mobile:** Refers to any dwelling designed for movement and actually moveable, such as a trailer, railway car, or boat, if occupied by persons with no other usual residence at the census date.

Other terms used in this report are defined as follows:

### Tenure

A dwelling is classified as "owned" (even though mortgaged) if it belongs to some member of the household; otherwise, it is classified as "rented", whether or not a specified rent is paid.

### Geographic areas

**Census divisions.**—Since there are no fixed political divisions in the four western provinces and Newfoundland corresponding to the counties of eastern Canada, permanent areas known as census divisions were established in these provinces for the presentation of statistical data.

**Rural and urban.**—The 1966 Census definition of rural and urban specified that all cities, towns and villages of 1,000 and over, whether incorporated or not, were classed as urban, as well as the urbanized fringes of (a) cities classed as metropolitan or other major urban areas, and (b) certain smaller cities if the city together with its urbanized fringe was 10,000 population or over. The remainder of the population was classed as rural.

**Farm and non-farm.**—Dwellings were classified as "rural farm" if they were situated on farms in rural localities. A farm for the 1966 Census was defined as a holding of one or more acres with sales of agricultural products of \$50 or more. Rural dwellings not situated on a farm were classified as "non-farm".

**Census metropolitan and other major urban areas.**—Metropolitan areas, as defined for the census, relate to groups of urban communities in Canada which are in close economic, geographic and social relationship. Communities classed as other major urban areas possess characteristics of metropolitan areas but, in most cases, the cities proper are smaller in size.

Le présent rapport, qui donne les résultats définitifs du recensement de 1966, est le deuxième d'une série formant le volume II du recensement. Les logements occupés y sont classés d'après le type et le mode d'occupation pour les:

- i) provinces, régions rurales agricoles et non agricoles, et centres urbains par tranche de taille (tableau 3);
- ii) comtés et divisions de recensement (tableau 4);
- iii) cités, villes et villages constitués de 1,000 habitants et plus, et autres subdivisions municipales de 10,000 et plus (tableau 5);
- iv) zones métropolitaines de recensement (tableau 6);
- v) autres grandes agglomérations urbaines (tableau 7).

## Définitions

### Logement

Pour les fins du recensement, le logement est un ensemble de pièces d'habitation distinct quant à la structure et ayant une entrée privée donnant sur l'extérieur ou sur un couloir ou un escalier commun à l'intérieur. Voici les divers types de logements:

**Individuel isolé:** Ce type de logement est communément appelé "maison individuelle". Il ne contient qu'un seul logement complètement isolé, de tous côtés, de tout autre logement ou construction.

**Individuel attenant:** Cette catégorie comprend les logements séparés par un mur mitoyen s'élevant du sol au toit. Les logements individuels attenants faisant partie de structures ne comptant que deux logements sont classés comme **individuels jumelés (maison double)**. Tous les autres logements individuels attenants, qu'ils fassent partie d'une rangée de trois logements ou plus ou qu'il s'agisse simplement d'un logement attenant à un magasin ou à une autre construction non domiciliaire, sont classés comme **individuels attenants (maisons groupées)**.

**Appartements et plain-pied:** Ces logements se subdivisent eux aussi en deux catégories. **Appartement, plain-pied (duplex):** ce sont les logements d'une structure construite ou transformée de façon à donner deux logements situés l'un au-dessus de l'autre sans autre construction attenant. **Appartement, plain-pied (autre):** ce sont tous les logements du type appartement ou plain-pied et qui ne sont pas de la catégorie des duplex.

**Mobile:** Il s'agit de tout logement destiné à être transporté et réellement transportable (remorque, wagon, ou bateau) s'il était occupé par des personnes sans autre résidence ordinaire au moment du recensement.

Voici la définition de quelques autres expressions utilisées dans le présent rapport:

### Mode d'occupation

Un logement est classé comme étant celui du "propriétaire" (même s'il y a des hypothèques) s'il appartient à quelque membre du ménage; autrement, il est classé comme un logement de "locataire", qu'un loyer donné soit payé ou non.

### Régions géographiques

**Divisions de recensement.**—Étant donné que dans les quatre provinces de l'Ouest et à Terre-Neuve il n'y a pas de divisions politiques qui correspondent aux comtés de l'est du Canada, des divisions de recensement ont été établies pour les besoins de la présentation statistique.

**Population rurale et population urbaine.**—La définition des termes "rural" et "urbain", au recensement de 1966, précise que tous les cités, villes et villages de 1,000 habitants et plus, qu'ils soient constitués ou non ont été classés "urbain" aussi bien que les banlieues urbanisées des a) cités classées zones métropolitaines ou autres grandes agglomérations urbaines, b) certaines petites cités si celles-ci et leurs banlieues urbanisées comptent 10,000 habitants ou plus. Le reste de la population a été classé "rural".

**Agricole et non agricole.**—Les logements ont été classés sous "rural agricole" lorsqu'ils étaient situés dans des fermes de localités rurales. Au recensement de 1966, on a appelé "ferme" tout bien-fonds d'une acre ou plus dont l'exploitation permettait des ventes de produits agricoles d'au moins \$50. Les logements ruraux non situés dans des fermes ont été classés "non agricoles".

**Zones métropolitaines et autres grandes agglomérations urbaines de recensement.**—Au sens du recensement, les zones métropolitaines sont des groupes de collectivités urbaines étroitement connexes du point de vue économique, géographique et social. Les collectivités figurant sous la rubrique "Autres grandes agglomérations urbaines" possèdent les caractéristiques des zones métropolitaines mais, dans la plupart des cas, la taille des cités proprement dites est plus petite.
